“Fences and Bridges”

Fences:

“One would think that we could have learned from the history of fences and walls that their construction is futile. That was the case with the Chinese in the third century BC, and more recently with the Soviets in Berlin. My government erects a senseless wall at the Mexican border, and the Israelis continue to attempt to wall off the Palestinians.”

Bridges:

“I’ve been told that building a bridge across a chasm in low technology societies starts with shooting an arrow with a light string attached from one side to the other. The string is then used to pull a light rope, which, in turn, pulls a heavier rope, and so on until a structure sturdy enough to support human traffic is constructed.”

The University of South Bohemia in České Budějovice

- Faculty of Economics
- Faculty of Fishery and Water Protection
- Faculty of Philosophy
- Pedagogical Faculty
- Faculty of Science
- Faculty of Theology
- Faculty of Health and Social Studies
- Faculty of Agriculture

- Institute of Physical Biology

The University of South Bohemia in České Budějovice and following

Non-European Universities in Co-operation:

University of Newcastle, Australia

Kochi University, Japan

Kagawa University, Japan

University of Tsukuba, Japan

University of Manitoba, Canada

York University, Canada

Iowa State University, U.S.A.

University of Arizona, U.S.A.

Georgia Southern University, U.S.A.

Winona State University, U.S.A.

Armstrong Atlantic State University, U.S.A.

University of New Orleans, U.S.A.

Clemson University, U.S.A.

National Taiwan University, Taiwan

University of Pretoria, S. Africa

University of Namibia

University of Zambia

The University of Arizona, Tucson, AZ, U.S.A.
